

# Event Photography

This document details the typical service we offer events like Oxford College balls. However, please note that we will happily adapt our services to meet the unique needs of your event. Please email [mark@acooldryplacephotography.com](mailto:mark@acooldryplacephotography.com) with your request.

## What we offer as standard

If you decide to use aCoolDryPlace Photography as the exclusive photographers for your event, we can offer the following services for NO COST AT ALL<sup>1</sup>:

i) We will set up an on-site studio and provide studio photography throughout the night. We can also provide some candid photography around the event if you wish. We feel by offering to turn up and shoot free of charge we offer the best deal for both the ball organisers and those buying the photos.

ii) We provide our services for your publicity material. We offer a free photo session with your models/volunteers to get the images you need for your promotional material. Whilst we retain copyright for these images, we will grant you a license (at no cost) to use them in all promotional material for the event.

Thanks for everything, it was lots of fun having you taking photos! Will make sure I recommend you to next year's Ball Committee.  
– Vanina Wittenburg, Treasurer, Wolfson Ball 2007

## Additional ideas

Many events offer photography as standard. We would love to work with you to find some way to set your event apart from the rest. Perhaps you could offer your studio photo as part of their ticket price (from as little as 10p per person). We would be very happy to discuss these, or any other ideas, with you to help make your event special.

Obviously, the standard of photography will be important to you and the attendees of your event. The original digital files we use are of a sufficient resolution to easily produce 30x20" enlargements. Photos from recent events can be seen on our website:

<http://www.acooldryplacephotography.com>

<sup>1</sup> Assumes a sufficient number of ball-goers. Charges may apply for small events.
