

Event Photography

aCoolDryPlace Photography

This document is targeted at a typical Oxford Black-tie ball, although we will happily adapt our services to meet your needs for other events. Please email mark@acooldryplace.org with your request.

What we offer as standard

If you decide to use aCoolDryPlace Photography as the exclusive photographers for your college ball, we can offer the following services for NO COST AT ALL*:

i) We will set up an on-site studio and provide studio photography throughout the night. We can also provide some candid photography around the ball if you wish. We feel by offering to turn up and shoot free of charge we offer the best deal for both the ball organisers and those buying the photos.

ii) We provide our services for your publicity material. We offer a free photo session with your models/volunteers to get the images you need for your promotional material. Whilst we retain copyright for these images, we will grant you a license (at no cost) to use them in all promotional material for the ball.

Additional ideas

Most balls offer photography as part of the entertainment at the ball. We would love to work with you to find some way to set your ball apart from the rest. Perhaps you could offer your ball-goers a survivors photo or studio photo as part of their ticket price (from as little as 10p per person). We would be very happy to discuss these, or any other ideas, with you to help make your ball special.

Obviously, the standard of photography will be important to you and the ball-goers. The shots included here are from Linacre ball 2007. These files are at a reduced resolution, but the originals are of a sufficient resolution to easily produce 30x20" enlargements. All of the photos from that event can be seen at www.acooldryplace.org/photography/

* Assumes a sufficient number of ball-goers. Charges may apply for small events.
